

New Product Announcement:

PT-tools™ model TA-1 strap-on telephone amplifier

Finally a strap-on telephone amplifier that is made for the real life needs of Hard of Hearing people. Historically this product category has been a realm of low quality or marginal performance devices despite a clear need for an acoustically coupled portable telephone amplifier for HOH travelers. PT-tools TA-1 meets the basic needs providing acoustic boost of up to 25db then adds a feature unique to ELT designs, a “dummy” or pseudo-stereo 3.5mm output jack to accommodate direct connection to a compact headphones and a variety of hearing aid and cochlear implant couplings.

Features:

- 25db acoustic boost
- Soft rubber acoustic coupler
- 3.5mm “dummy” or pseudo-stereo output jack for neckloops, DAI, Silhouettes, stereo headphones, earbuds, CI implant patch cables and other output couplings.
- Woven elastic retaining strap
- LED Power status indicator
- Locking battery compartment
- 2x AAA alkaline battery power (included)
- Neoprene soft zipper carrying case included
- 1yr warranty
